

Cloud SQL

ANURAG UNIVERSITY

### Cloud SQL

Cloud SQL is a fully-managed database service that is part of the Google Cloud Platform. It supports both MySQL and PostgreSQL engines, and offers high-availability, automatic backups, and easy scalability.

With Cloud SQL, users can quickly set up and manage their database without having to worry about infrastructure or maintenance. It also integrates seamlessly with other Google Cloud services, making it a popular choice for businesses looking to streamline their operations in the cloud.
